

Week of Feb 27th

What have I worked on?

We have completed the preliminary analysis on the given dataset, which will be included along with this scrum report.

What will I be working on next?

We hope to receive more information on the datasets from the client this week. This could help us understand the datasets better and find a method to assign accessibility scores. In addition, we would also be looking further into our datasets and reviewing each other's analysis to see if we have overlooked anything.

Quang- Sidewalk_Hazards_1(Anargh's)

Pranesh- Sidewalks_3(Akarvin's)

Akarvin- Roadway_Centerline(Quang's)

Anargh- Ramps_0(Pranesh's)

The purpose of this is to try to find similarities between each other's data set while bringing in another perspective to the table.

Have I run into any issues? Do I need help?

There are a lot of ambiguities in the datasets, which required further clarification from the client.

Team Lead: Have I talked to the client recently? When are we meeting with them next?

We will be talking to the client later this week on Thursday.
