

Weekly Scrum Report document - 4

Aka: Deliverable_1

Project Name: BU Sidewalk Project

Project Status: Ongoing

Current Sprint: 4

Report Date: 3/1/2023

Presented Team 2 Members:

Billy Nowosielski

Xiao Zhang

Haocheng Zhao

What have we worked on?

We did preliminary analysis on the csv files that we have. We focused on making a heat map of accessibility, data cleaning of the whole table, understanding and expectations of unclear data indexes.

What are our top priorities?

Completed the deliverable 1 and prepared our questions for the Thursday meeting with clients.

How are we dividing up tasks?

We are going to have each member analyze one of the datasets

Sidewalks_3 Xiao Zhang (Understanding and expectation)

Sidewalks_Hazards_1 Billy Nowosielski (Heatmap and monthly pinpoints to see where the city is focusing repairs)

Roadway_Centerline_2 Haocheng Zhao (Data cleaning)

Ramps_0 Arnav Misra ----- Xiao Zhang (Arnav was missing and inaccessible through slack. So Xiao made a simple analysis on the file.)

Summary

We tried our best to understand the data, but there is still lots to deal with the clients. One team member is missing in this week. Team rep will talk to PM for this situation. Hope we can find a solution.
