Week of April 10th

What have I worked on?

We have worked on the analysis of the ramp data with the population. Additionally, we have also worked on identifying a ramp score based on the hazards by calculating the distance between the point and the ramp polygon.

What will I be working on next?

Quang - Analysis wrt hospitals and transit stops - identifying the sidewalks

Anargh and Akarvin - Continue working on developing an accessibility score

Pranesh - Analysis with population data. How to normalize the data wrt ramp information

Have I run into any issues? Do I need help?

We found it difficult to understand how to normalize the data wrt population. We spoke to the PM about it and she gave us some suggestions as well which we will work on.

Team Lead: Have I talked to the client recently? When are we meeting with them next?

No, the meeting was rescheduled. We may meet him on Monday.
